Recombinant human FEN1 protein

Catalog Number: ATGP0442

PRODUCT INFORMATION

Expression system

E.coli

Domain

1-380aa

UniProt No.

P39748

NCBI Accession No.

NP 004102.1

Alternative Names

Flap structure-specific endonuclease 1, FEN-1, MF1, RAD2, Flap structure-specific endonuclease 1 DNase IV, Flap endonuclease 1, Flap structure specific endonuclease 1, hFEN1, Maturation factor 1,

PRODUCT SPECIFICATION

Molecular Weight

42.5 kDa (380aa) confirmed by MALDI-TOF

Concentration

1mg/ml (determined by Bradford assay)

Formulation

Liquid in. 20mM Tris-HCl buffer (pH 8.0) containing 1mM DTT 10% glycerol

Purity

> 90% by SDS-PAGE

Tag

Non-Tagged

Application

SDS-PAGE

Storage Condition

Can be stored at +2C to +8C for 1 week. For long term storage, aliquot and store at -20C to -80C. Avoid repeated freezing and thawing cycles.

BACKGROUND

Description

FEN-1, also known as Flap structure-specific endonuclease 1, removes 5' overhanging flaps in DNA repair and processes the 5' ends of Okazaki fragments in lagging strand DNA synthesis. The protein is a member of the XPG/RAD2 endonuclease family and is one of ten proteins essential for cell-free DNA replication. FEN-1 is highly homologous to yeast Rad2. The C-terminal region of FEN-1 may bind to PCNA, thus allowing FEN-1 to function as an exonuclease in DNA replication. Recombinant human FEN-1 protein was expressed in E. coli and purified by

DATA

SDS-PAGE

3ug by SDS-PAGE under reducing condition and visualized by coomassie blue stain.
