

Recombinant human SMUG1 protein

Catalog Number: ATGP1848

PRODUCT INFORMATION

Expression system

E.coli

Domain

1-270aa

UniProt No.

Q53HV7

NCBI Accession No.

NP_055126

Alternative Names

Single-strand-selective monofunctional uracil-DNA glycosylase, FDG, HMuDG, uNG3

PRODUCT SPECIFICATION

Molecular Weight

32.3 kDa (293aa) confirmed by MALDI-TOF

Concentration

0.5mg/ml (determined by Bradford assay)

Formulation

Liquid in. 20mM Tris-HCl buffer (pH 8.0) containing 0.2M NaCl, 30% glycerol, 1mM DTT

Purity

> 95% by SDS-PAGE

Tag

His-Tag

Application

SDS-PAGE

Storage Condition

Can be stored at +2C to +8C for 1 week. For long term storage, aliquot and store at -20C to -80C. Avoid repeated freezing and thawing cycles.

BACKGROUND

Description

Single-strand-selective monofunctional uracil-DNA glycosylase, also known as SMuG1, is a enzyme responsible for recognizing base lesions in the genome and initiating base excision DNA repair. This protein acts as a monofunctional DNA glycosylase specific for uracil (u) residues in DNA and has a preference for single-stranded DNA substrates. Recombinant human SMuG1 protein, fused to His-tag at N-terminus, was expressed in E. coli and purified by using conventional chromatography techniques.

DATA

SDS-PAGE

3ug by SDS-PAGE under reducing condition and visualized by coomassie blue stain.

15% SDS-PAGE (3ug)
