

Recombinant human EHF protein

Catalog Number: ATGP2059

PRODUCT INFORMATION

Expression system

E.coli

Domain

1-300aa

UniProt No.

Q9NZC4

NCBI Accession No.

NP_036285

Alternative Names

ETS homologous factor isoform 2, ESE3, ESE3B, ESEJ

PRODUCT SPECIFICATION

Molecular Weight

37.3 kDa (323aa)

Concentration

1mg/ml (determined by Bradford assay)

Formulation

Liquid in. 20mM Tris-HCl buffer (pH 8.0) containing 0.4M urea, 10% glycerol

Purity

> 90% by SDS-PAGE

Tag

His-Tag

Application

SDS-PAGE, Denatured

Storage Condition

Can be stored at +2C to +8C for 1 week. For long term storage, aliquot and store at -20C to -80C. Avoid repeated freezing and thawing cycles.

BACKGROUND

Description

ETS homologous factor isoform 2, also known as EHF, is a distinct member of the ESE subfamily of Ets transcription factors. Ets factors constitute one important class of transcriptional regulators that play critical roles in hema-topoiesis, angiogenesis, organogenesis, oncogenesis and specification of neuronal connectivity. It is exclusively expressed in a subset of epithelial cells, with highest expression detected in glandular epithelium of the prostate, pancreas, salivary gland and trachea. EHF transactivates the c-Met promoter via three high affinity binding sites, which suggests that EHF may contribute to branching morphogenesis. Recombinant human

Recombinant human EHF protein

Catalog Number: ATGP2059

EHF protein, fused to His-tag at N-terminus, was expressed in E. coli.
