# Recombinant human VCAM-1/CD106 protein

Catalog Number: ATGP3468

## **PRODUCT INFORMATION**

## **Expression system**

Baculovirus

#### **Domain**

25-698aa

#### UniProt No.

P19320

#### **NCBI Accession No.**

NP 001069

#### **Alternative Names**

Vascular cell adhesion protein 1 isoform, VCAM1, CD106, INCAM-100

## PRODUCT SPECIFICATION

### **Molecular Weight**

75.6 kDa (685aa)

#### Concentration

0.5mg/ml (determined by absorbance at 280nm)

#### **Formulation**

Liquid in. Phosphate-Buffered Saline (pH 7.4) containing 10% glycerol

#### **Purity**

> 90% by SDS-PAGE

#### **Endotoxin level**

< 1 EU per 1ug of protein (determined by LAL method)

## **Biological Activity**

Measured by the ability of the immobilized protein to support the adhesion of U937 Human histiocytic lymphoma cells. When cells are added to VCAM1 coated plates 10ug/ml. This effect is more to 70%.

## Tag

His-Tag

## **Application**

SDS-PAGE, Bioactivity

## **Storage Condition**

Can be stored at +2C to +8C for 1 week. For long term storage, aliquot and store at -20C to -80C. Avoid repeated freezing and thawing cycles.

## **BACKGROUND**

## Recombinant human VCAM-1/CD106 protein

Catalog Number: ATGP3468

### **Description**

VCAM1, also known as vascular cell adhesion protein 1 isoform, a member of the immunoglobulin superfamily. It is a cell surface protein expressed by activated endothelial cells and certain leukocytes. VCAM1 expression is induced on endothelial cells during inflammatory bowel disease, atherosclerosis, allograft rejection and asthmatic responses. During the inflammatory adhesion mechanism, activated integrins that rolling leukocytes and attach them firmly to the vascular endothelium. Recombinant human VCAM1, fused to His-tag at C-terminus, was expressed in insect cell and purified by using conventional chromatography techniques.

## **DATA**

#### SDS-PAGE

3ug by SDS-PAGE under reducing condition and visualized by coomassie blue stain.
